Write script to serialize and send data	25d																																																								
Test with several open data portals	20d																																																								
Early system implementation																																																									
Project re-analysis	3d																																																								
Escalate the network	15d																																																								
Wait for the final components to arrive	70d																																																								
Adapt code for new sensors	10d																																																								
Deployment	20d																																																								
Troubleshooting	10d																																																								
Web application	20d																																																								
Network completion																																																									
Project final evaluation	3d																																																								
Final documentation	30d																																																								
Final presentation	20d																																																								
Project defense
